

# Health-Related Reports: A Key to Full Titles

Library and Student  
Support

Official health-related reports, green papers, white papers and acts of parliament are often known by short, "popular" titles typically taken from the name of the person who chaired the group which produced the document. To find or to reference one of these items, you will need to provide its full, official title and bibliographic details.

Below is an alphabetical list of the popular titles of documents published in the UK. Each entry provides the item's full title and further bibliographic details. If items share a popular title, entries are arranged in chronological order. A link to the full-text of the report or a related website is included where possible.

Help with incomplete entries and recommendations for additions would be much appreciated.

**Please Note: I am not able to supply fax, photocopies or electronic copies of items on this list.**
